Art Unit: 3652

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to a gripping apparatus, classified in class 294, subclass 86.4.
 - II. Claims 20-24,49-51,77-88, drawn to an apparatus and method for Gel Electrophoresis processes, classified in class 406, subclass 456.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because many different gel-gripping devices can be used for processing of gel electrophoresis in a tank. The subcombination has separate utility such as a grapple or gripper, fluid pressured grapple, biasing grapple, magnetic gripper, and magnetic retrieving devices.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
